

Postdoctoral Research Fellow Position

£29,704 - £35,469

A postdoctoral position is available to undertake MRC-funded research investigating the role of Down's Syndrome trisomy on different mechanisms of synaptic vesicle recycling. The position is for three years and is based at the Centre for Integrative Physiology. You will be ambitious and self-motivated and join a well funded research laboratory within a vibrant research community focussing on vesicle and protein traffic. Experience in cell/molecular neuroscience and live cell fluorescence imaging is particularly desirable.

Apply online and view further particulars at our website (www.jobs.ed.ac.uk). Job reference is: 3014868.

Closing date: **19th October 2011.**
