

American Society for Neurochemistry

The Latest in Molecular and
Cellular Neurobiology in the Americas

Advancing ASN Core Values of Diversity, Equity, & Fostering Excellence

We believe in the strength of diversity in all its forms. We recognize that inclusion of and respect for ideas from a diverse group of scientists leads to scientific innovation and advances in neurochemistry.

The American Society of Neurochemistry (ASN) is dedicated to enhancing diverse, multicultural perspectives that are critical to the success of the society. Diversity among members broadens perspectives, creates role models, and enhances trust. ASN strives to create and maintain an environment that welcomes and respects individuals with diverse perspectives, experiences, and backgrounds. Dimensions of diversity include, but are not limited to, race, ethnicity, religion, sex, sexual orientation, gender identity, age, and socioeconomic and geographic background.

ASN is committed to having respect for diversity, broad representation at all levels, and has implemented policies to embrace diversity. We welcome your participation and your suggestions on how to continue to broaden diversity within our society and our field. asnmanager@asneurochem.org.
